

E-mail Test Tools

CanIEmail.com:

I used this site extensively throughout HW1 and 2, and I appreciate how thorough the specifications are! I never realized how many different e-mail clients are in use and how widely compatible features might vary.

PutsMail:

This is a very easy tool to use, as you simply copy and paste your e-mail's HTML and embedded/inline CSS into the form. It then sends a test e-mail to the specified e-mail addresses. One downside to this tool is that unless you have willing participants, you'll have to have multiple clients configured with at least one existing email account to test functionality in each client.

Recipients – up to 10 email addresses that you own and control. [Learn more](#)

Where we will send your email

Subject Line

Test email-wipers

Body (HTML)

HTML

Apple Watch

Plain Text

```
595         P.O. Box 97281<br />
596         Phoenix, AZ 85060<br />
597         USA<br />
598     </p>
599     <a href="#">Unsubscribe</a>
600 </td>
601 </tr>
602 </table>
603 </td>
604 </tr>
605 </table>
606 </body>
607 </html>
608
```

Why three parts? It's best practice to include a [plain text](#) version of your email along with the HTML part. You can also create a [third part](#) specific to Apple Watch users.

☐ Move my CSS inline when I click Send Email (for best results in Gmail and Outlook)

✓ I'm not a robot

Send Email

Outlook Online - images are blocked by default settings, animations and “slideshow” component do not work:

Sun 10/9/2022 8:32 PM

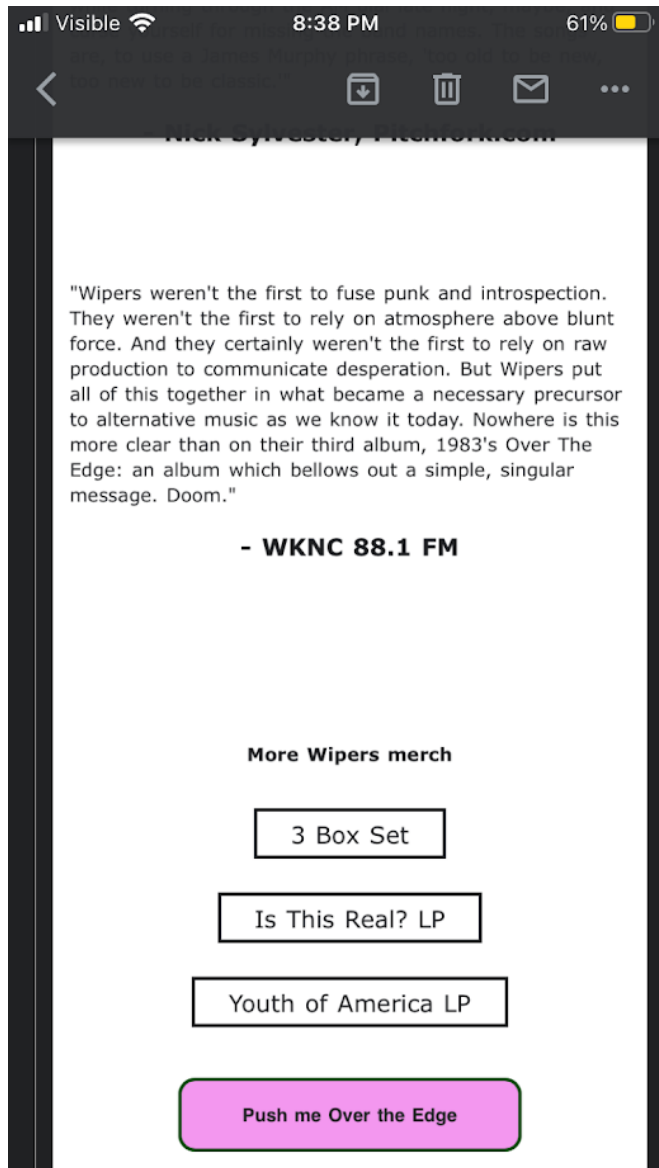

You don't often get email from putsmail@putsmail.litmus.com. [Learn why this is important](#)

Both RoundCube and Gmail in browser - Similar issues to Outlook Online:

Gmail on iPhone - background colors are not defined:

Campaign Monitor's CSS List:

This website is both useful and discouraging. Why on Earth would AOL Alto support class name selectors but not support style tags in the head? It's also fascinating to me that AOL webmail is the only web client to support CSS Flexbox.

Litmus:

I did not use Litmus, because they charge over \$1000 for a yearly subscription and I did not want to accidentally forget to cancel before the free trial ended. Seems like it might be worth the money for a business with heavy e-mail traffic, though!
